Your abstract here

## 1 Intro

To use this template, open a new folder and type: `nix flake init -t github:mmesch/flakeTemplates#pandocmax`. Then type `nix build` to produce a PDF from `README.md` and edit the `flake.nix` to use other files. The template can already use citations<sup>1</sup> and references to sections, e.g. to sec sec. 1, figures, etc ...

## 2 Diagrams

### 2.1 Plantuml

```
@startuml
scale 400
!include <C4/C4_Container>

Person(personAlias, "Label", "Optional Description")
Container(containerAlias, "Label", "Technology", "Optional Description")
System(systemAlias, "Label", "Optional Description")

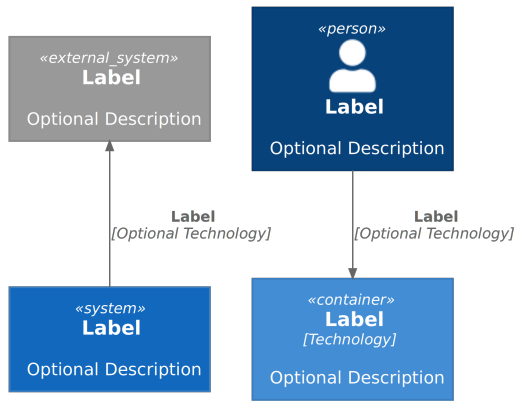

System_Ext(extSystemAlias, "Label", "Optional Description")

Rel(personAlias, containerAlias, "Label", "Optional Technology")

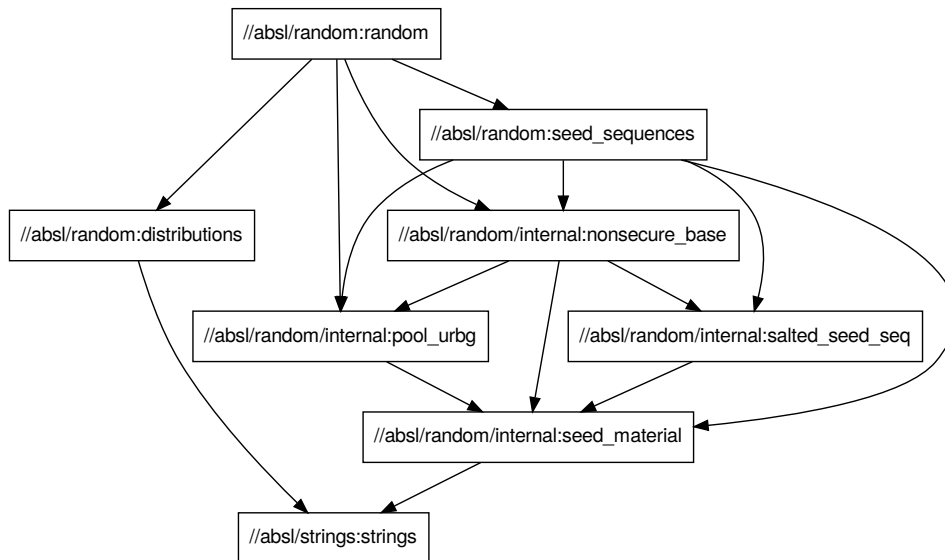

Rel_U(systemAlias, extSystemAlias, "Label", "Optional Technology")
@enduml
```
